Education

Clarion University / BS Computer Science

2018, CLARION PA

Clarion University / Information System Minor

2018, CLARION PA

About

I am a Web Designer/Developer with a passion for creating clean, pragmatic designs. I enjoy making websites and apps with a modern touch to them. My previous line of work in retail with the public has grown my patience and empathy as well as shaped my skills in time management and prioritizing.

I love to create clean, modern user interfaces that enhance the user's overall experience with the product.
